FOR IMMEDIATE RELEASE

WOLPERTINGER GAMES announces SURVIVOR MERCS demo for Steam Next Fest in June 2023

Munich, Germany – May 31st, 2023 – Play the *Survivor Mercs* demo during *Steam Next Fest* from June 16-19, 2023 and see for yourself how the next evolution of survivor-like and single-player extraction shooter is a match made in bullet-heaven.

Strike. Loot. Extract. Repeat. Lead your mercenary squad into battle and survive against a relentless army. Grab as much loot as you can and extract from the battlefield or face the final boss for the rarest drops. Thousands of unique commanders guarantee dozens of hours of fun where no run will be the same. Challenge the enemy and epic bosses on many different, procedurally generated maps. Spend your loot to recruit new Mercs, procure additional equipment, and upgrade your Bunker HQ to gain access to powerful upgrades.

“After our whole team sank hundreds of hours into *Vampire Survivors* and *Zero Sievert*, we wanted to take the best of both games and blend them into a roguelite that feels like THE logical next step”, says Sebastian Bender, Boss Wolpertinger and game director of *Survivor Mercs*.

“I am extremely proud of what our team has achieved, we are super-excited to present the game to the world in Steam Next Fest. The demo shows the foundation of the game we want to build – we are really looking forward to continuing development with the input from our community.”

Survivor Mercs will be released into Early Access soon after Steam Next Fest. The game is planned to come to PC and consoles with a full release in early 2024.

Wishlist the game now on Steam: https://store.steampowered.com/app/2141520/Survivor_Mercs

About Wolpertinger Games

Wolpertinger Games is an independent game development studio from Munich, Germany, founded in 2009 by Sebastian Bender and Remote Control Productions.

The team successfully delivered more than 35 games and gamification projects for major international partners and brands. With *Survivor Mercs* the Wolpertingers are looking to break into the B2C market and create games directly for the players.
